

PRODUCT CATALOGUE
PORTABLE PISTON COMPRESSORS

PORTABLE PISTON COMPRESSORS

Reliable Machinery from the Experts.

GENERAL FEATURES

- CE certified pressure vessels
- Industrial-grade engine
- Cast iron crankcase
- Cast iron cylinders and cylinder heads
- Large flywheel for efficient cooling
- Automatic unloading and throttle control on select models
- Key start on diesel models as standard
- Low-RPM, long-life air pump
- Low maintenance costs
- Very affordable spares – available off the shelf
- Powder coated paint finish
- Multiple air outlets
- Designed to fit on most LDVs
- Air filter for engine
- Air filter for compressor
- 12V key start on selected models
- Fuel tank for up to 8 hours run-time
- Powder coated pressure vessel

FEATURES AND BENEFITS

FEATURE	BENEFIT
Pressure regulator	Easy pressure setting
Automatic throttle control	The engine will idle when full pressure is reached, saving fuel and reducing noise (selected models only)
Two- or three-cylinder configuration on the compressor pump	Reduces heat and noise while extending service life. Provides higher displacement and air volumes
Multiple air outlet options	Utilises multiple air tools to increase efficiency
Built for tradesmen	Portable and low weight allows for easy transport
Key start on selected models	Trouble-free starting

APPLICATION AREAS

Widely used in industries such as mining, mobile truck and tyre repairs, construction, energy resources and as back-up air supply. These machines are characterised by, portability, reliability and low running costs.

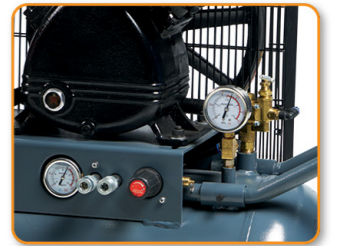

READY TO RUN

All Detroit Air portable piston compressors come ready to run and ready to work. With engine sizes ranging from 6.5HP up to 13HP in petrol variants and from 4.5HP up to 9HP in diesel variants, we have a machine for every job. All engines are sourced from reputable manufacturers and meet our stringent quality requirements.

AIR OUTLETS

Standard equipped with multiple air outlets makes hose fitting convenient and quick. Select models come standard with quick couplers and a pressure regulator fitted, as well as anti-vibration gauges. Standard outlet sizes are 1/4", 1/2" and 3/4".

KEY START

Work smart, not hard. Select models are fitted with a reliable key start system to keep efficiency high and avoid the problems associated with pull-starting a large engine. Simply connect up the starter to either an external 12V source or a machine-mounted 12V battery and turn the key.

PROTECTIVE AIR FILTRATION

All models come fitted with a heavy-duty filtration system designed to effectively remove dust and dirt from the intake air. 9HP diesel engines are fitted with an oil-bath filter suitable for really harsh conditions.

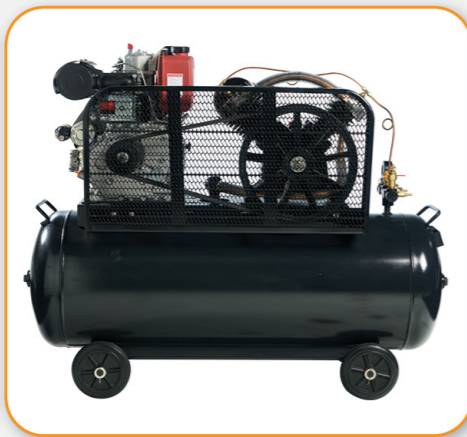

HEAVY-DUTY COMPRESSOR

Working hard is no problem for our tried and tested portable piston compressors. All pumps feature full cast iron cylinders and a crankcase with large-diameter pistons and heavy-duty imported valves. Detroit Air compressor pumps are built to last with multiple cylinders, high displacement and low RPM.

PORTABLE PISTON COMPRESSORS
